News

Drilling at Auld Creek

Rua Gold recently passed our 12-month anniversary of drilling in Reefton, the steady drilling this past year has helped us understand the ground better and identify new targets to explore as we keep moving forward.

About Rua Gold

Rua Gold is a minerals company at the forefront of the mining industry, specializing in gold exploration and discovery.

Historical mining in the Reefton Goldfield started in 1872, and by its close, had produced 2 million ounces of gold from high-grade underground operations in orogenic quartz vein systems.

Rua Gold holds 95% of the tenements in this district and is currently drilling multiple targets across the land package.

Exploration Spend

Rua Gold has invested \$10 million into the exploration of the Reefton Goldfields and has budgeted to spend more than this amount in 2026.

Environment

Water Monitoring

Our Reefton team has commenced our water monitoring program to gain a clearer understanding of the receiving environment and help shape our permitting approach for the Auld Creek project.

Shareholder Connections

We recently heard from a Rua Gold Shareholder, Ike. Ike's grandfather was a miner in the Reefton Goldfields following the war. This connection to the township of Reefton lead Ike to become a shareholder in Rua Gold and support the next chapter of mining in Reefton. Thank you for sharing your story Ike!
